

RAAHE

CONCENTRATION OF METAL INDUSTRY AND CLEAN ENERGY

Raahe invests in the green transition and entrepreneurship, and everything and everyone is close by. This sea town, best known for its industry, is the site of numerous investment opportunities in addition to its rich history and stunning archipelago. A safe, low-traffic and clean environment, functional fiber connections and excellent housing, education and leisure facilities ensure that your employees can also enjoy themselves.

WHAT WE OFFER:

Vipuvoimaa
EU:lta
2014–2020

Concentration of metal industry and clean energy

- Concentration of metal industry and clean energy
- The largest steel plant in the Nordic countries and the related industries form an exceptionally strong base of expertise and a network that has accumulated over decades.
- The town hosts a wide range of industrial, logistics, IT and construction subcontracting companies with experience in large projects also on an international level.
- One sixth of Finland's total wind power capacity is in the Raahe region, and production will continue to grow.

Opportunities in several industries

- Offshore wind (hub), hydrogen economy, production and technology in particular
- Mining, battery and chemical industries
- Agriculture and food industry
- Tourism, trade and services

Space to grow and develop

- For quick placement decisions, we have tens of hectares of pre-planned business plots and the possibility of combining plots for more space-intensive operations.
- Plots are located next to the electrified railway connection, the port and the steel plant as well as highway 8.
- Close proximity to a subcontracting network and city center services.
- Facilities for a wide range of needs and readiness for tailored solutions.
