

SIEVI

GENERATES GROWTH FOR INTERNATIONAL MARKETS

Sievi is located in the middle of a vibrant countryside, but at the same time it is one of the most industrialized places in Finland relative to the number of inhabitants. Sievi's business environment is international - many companies operate worldwide from here. Sievi also offers opportunities for employees from abroad. In addition to jobs, here you can find a safe environment, good services and clean nature.

WHAT WE OFFER:

Vipuvoimaa
EU:lta
2014–2020

International industrial operating environment

- Metal industry and OEM manufacturing are strong industries in Sievi. The construction industry is also growing. - Sievi is the largest footwear manufacturer in Northern Europe.
- Industry and good transport connections also feed the logistics sector.

Opportunities brought by new industries

- Vibrant countryside offers new opportunities in, for example, bioeconomy and renewable energy production.
- Wind power is heavily invested in the region, and the construction of industrial-scale solar power plants is currently being investigated.
- The area's new growth industry is the battery industry. A lithium mine is opening near Sievi, and a lithium chemical factory will be built in Kokkola, less than an hour away.

Space and services to grow operations

- In Sievi, ready-zoned plots of land are available for companies, the size of which can be adapted to the needs of a wide range of business activities.
- In Sievi, entrepreneurship and the well-being of companies is at the center of the municipal strategy.

SIEVI

- Located in the southern part of North Ostrobothnia.
